DISCLAIMER

Trade to Win for TradingView is NOT a buy sell signal system. It is a decision support system to help traders and investors trade the markets in the footsteps of “smart money”.

Trading all markets contains substantial risk. An investor could potentially lose all or more than the initial investment. Risk capital is money that can be lost without jeopardizing ones’ financial security or life style. Only risk capital should be used for trading and only those with sufficient risk capital should consider trading. Past performance is not necessarily indicative of future results.

Hypothetical performance results have many inherent limitations, some of which are described below. no representation is being made that any account will or is likely to achieve profits or losses similar to those shown; in fact, there are frequently sharp differences between hypothetical performance results and the actual results subsequently achieved by any particular trading program. One of the limitations of hypothetical performance results is that they are generally prepared with the benefit of hindsight. In addition, hypothetical trading does not involve financial risk, and no hypothetical trading record can completely account for the impact of financial risk of actual trading. for example, the ability to withstand losses or to adhere to a particular trading program in spite of trading losses are material points which can also adversely affect actual trading results. There are numerous other factors related to the markets in general or to the implementation of any specific trading program which cannot be fully accounted for in the preparation of hypothetical performance results and all which can adversely affect trading results.

Trading Strategy for a long trade with confirmation

Step 1

Wait for a potential buying indicator to appear and the trigger lines to draw.

Step 2

Wait for a confirmation indicator to appear – either a Shakeout or Test.

Step 3

Wait for the short term trend dots change to green (if they are not already green).

Step 4

Place a buy order a few ticks above the high of the upper trigger line.

Step 5

Exit the trade when it reaches your target level.

Trading Strategy for a short trade with confirmation

Step 1

Wait for a potential selling indicator to appear and the trigger lines to draw.

Step 2

Wait for a confirmation indicator to appear – either an Upthrust or No Demand.

Step 3

Wait for the short term trend dots change to red (if they are not already red).

Step 4

Place a buy order a few ticks below the low of the lower trigger line.

Step 5

Exit the trade when it reaches your target level.

Trading Strategy for a long trade without confirmation

Step 1

Wait for a potential buying indicator to appear and the trigger lines to draw.

Step 2

Wait for the short term trend dots change to green (if they are not already green).

You can enter on the 1st, 2nd or 3rd green dot according to your appetite for risk.

Step 3

Place a buy order a few ticks above the high of the upper trigger line.

Step 4

Exit the trade when it reaches the target level.

Trading Strategy for a short trade without confirmation
